PROFESSIONAL SUMMARY

Java Backend Developer with **4.6 years of experience** in designing and developing scalable microservices using **Spring Boot, Java, Hibernate, JPA, and REST APIs**. Strong expertise in building secure backend systems with JWT-based authentication, deploying applications on **AWS (EC2, S3)**, and working with **PostgreSQL** and **MongoDB**. Experienced in collaborating with cross-functional teams and delivering high-quality, production-ready applications.

TECHNICAL SKILLS

- **Backend:** Core Java, Spring Framework (Spring Boot, Spring MVC, Spring Security), Hibernate, Spring Data JPA, REST APIs, Git
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Cloud / DevOps:** AWS (EC2, S3)
- **Logging & Monitoring:** SLF4J, Logback
- **Security:** JWT Authentication, Role-Based Access Control (RBAC)
- **Tools:** Swagger, Postman, Git, Bitbucket, Maven, Tomcat, SVN

PROFESSIONAL EXPERIENCE

Software Engineer *September 2021 – Present*
WV Automation Pvt Ltd *Hyderabad, India*

- Developed RESTful microservices using Spring Boot, JPA, and Hibernate.
- Secured endpoints with JWT-based authentication via Spring Security.
- Deployed services on AWS EC2 and supervised files using S3.
- Utilized SLF4J for logging and issue resolution.
- Designed and implemented RESTful APIs with CRUD functionalities for internal systems.
- Used Hibernate and JPA for ORM-based database interactions with PostgreSQL.
- Secured APIs via Spring Security and role-based access control.
- Wrote unit and integration tests and monitored logs through SLF4J.
- Built backend solutions using Core Java, spring, and Hibernate.
- Developed web applications with Spring MVC, ensuring form validation.
- Planned and optimized PostgreSQL and MongoDB databases.
- Directed application logging and troubleshooting via SLF4J.
- Worked closely with QA teams to ensure high-quality releases.

KEY PROJECTS & CONTRIBUTIONS

Project #2: Thedal Election (E-Governance Domain) *August 2023 – Present*

A full-stack application built with Spring Boot and MongoDB providing real-time voter insights and election data management. Includes modules for voters, volunteers, and election campaigns with JWT-based security and AWS S3 integration. Containerized using Docker and deployed on AWS EKS for scalable microservices orchestration.

- Enhanced order and inventory management modules using Spring Boot, JPA.
- Integrated JWT-based authentication for secure access to APIs.
- Deployed microservices on AWS EC2 and managed file storage using S3.
- Executed centralized logging and monitoring with SLF4J.
- Design and documented APIs using Swagger for smooth integration with third-party systems.
- Worked closely with business analysts to gather requirements.
- Improved API response time by **20%** by optimizing PostgreSQL queries.
- Reduced cloud storage costs by **15%** by optimizing AWS S3 usage.
- Containerized Spring Boot microservices using Docker and deployed them on AWS EKS.
- Worked with Kubernetes concepts: Pods, Services, Deployments, ConfigMaps, and auto-scaling within EKS.

Project #1: Fabric Play (Retail Domain) *April 2022 – July 2023*

A retail chain project specializing in arts and crafts, aimed at modernizing the online retail platform by building scalable microservices to handle orders, inventory, and customer management. Deployed on AWS supporting high availability and seamless customer experience across digital channels.

- Improved order and inventory management modules using Spring Boot, JPA.
- Integrated JWT-based authentication for secure access to APIs.
- Deployed microservices on AWS EC2 and oversaw file storage using S3.
- Applied centralized logging and monitoring with SLF4J.
- Created and documented APIs using Swagger for smooth integration with third-party systems.
- Worked closely with business analysts to gather requirements.
- Participated closely with QA teams to ensure high-quality releases.

EDUCATION

Bachelor of Technology (B.Tech) *2020*
JNTU Anantapur, Andhra Pradesh, India Percentage: 64.7%

ADDITIONAL STRENGTHS

- Strong communication and teamwork skills
- Ability to work independently and meet deadlines
- Quick learner and adaptable to changing environments
- Can help team members with both technical and domain
